Instructions for listening to a Mini Manna Bible teaching text file

using Natural Reader text-to-speech audio software

(Free version for personal use. © NaturalSoft Ltd. All rights reserved.)

Step-by-step instructions

1 In the Manna Online webpage, **click** on your choice of Mini Manna text files A, B, C, or D. (This provides you a **Save As** option.) **Highlight and Copy** the text then:
2 **Right click** and **open** this link for Natural Readers: https://www.naturalreaders.com/online/ or open the same link shown on the Manna Online webpage before Step 1. **Select** Online Reader if necessary.
3 **Point and place** your cursor at the beginning of the text in the text box on the Natural Readers screen. **Paste (Drop)** the whole of your copied text file into this text box to replace what is already there.
4 **Click** the Play/Pause icon in the top menu. When playing, use the Backward, Forward, Pause and Stop icons on the top menu as desired.
5 As a first-time user go to the drop-down menus **whilst playing** and:
   • **select** your preferred voice; for example, set to: English (UK) Rachel.
   • **select** your preferred dictation speed; for example, set to: -1.
   These settings will be automatically saved for you to use next time. You can try other settings at any time whilst playing.

Suggestion: As you listen to the reading, watch the highlighted words being spoken. Speak them aloud yourself to perfect your use of Easy English. Remember also that you are speaking the truth of God from the Bible as taught by Fred Morris. Amazing!

Note 1: Place names and people's names are not always pronounced correctly by the Natural Reader software.
Note 2: There is a daily time limit of around 20 minutes to use this free software.
